DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to an article.

Group II, claim(s) 16-28, drawn to process.

Group III, claim(s) 29-31, drawn to apparatus.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: For instance, the technical feature in all three of the above groups is the substrate with the limitations of claim 1. However, this technical feature is not the applicants' contribution over the prior art of Ushikubo (US PN 5,548,475) with obvious characteristics set forth by Uchiyama (US Pub. No. 2002/0110934).

Specifically, Ushikubo teaches a substrate, (Col. 4, lines 50-60), which as evidence by Uchiyama can be glass, coated with a thin dielectric film layer (abstract and Fig. 1). The film is deposited by magnetic sputtering (Col. 2, lines 19-26) in the presence of oxygen (Col. 6, lines 33-50). The film can then be exposed to an ion beam

(Claim 7) which inherently comes from an ion source. Also, the film is characterized in that the said dielectric layer can be crystallized (Col. 1, lines 35-55).

Due to the above teaching, unity of invention between the three groups above is lacking.

A telephone call was made to Norman Oblon on March 3, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
